

OFFICINA MECCANICA DI PRECISIONE CAGNONE MARIO

LAVORAZIONE CONTO TERZI - TORNITURA - FRESATURA - RETTIFICA - ELETTROEROSIONE
PROGETTAZIONE, COSTRUZIONE, MANUTENZIONE - STAMPI PER MATERIE PLASTICHE

Services and products

The knowledge of the production process and the development of the mechanical technologies have been the key elements which have contributed to the development business of **Officina Meccanica Cagnone Mario** focused on the production of high precision mechanical parts, worked to drawings. The company has also achieved a meaningful experience in various areas as:

- chip machining; CNC milling; turning; cutting, drilling, precision grinding of steels, hard metals, cast iron, bronze, alloy and plastic materials
- mechanical works on commission of small and middle series mechanical parts
- reconditioning, assembling and construction of mechanical groups
- realization of carpentries from customers drawings
- plunge spark erosion
- engineering and 3D drawings
- designing and realization of **MOULDS** for thermoplastic objects
- testing and final inspection

The workshop is also capable of furnishing the complete end product with any further **superficial finishings**:

- heat treatments (tempering, stress relieving, recovery, nitriding, cementation)
- galvanic treatments (burnishing, nickel-plating, chromium-plating, phosphating)
- covering treatments (anodizing)
- anticorrosive treatments and industrial painting

These treatments are provided through continuous collaboration with a series of reliable and professional suppliers with whom the company has established a confident working relationship over the years. The productive flexibility and the variety of the **MACHINERIES AND EQUIPMENTS** allow to adapt rapidly to the **CUSTOMER** requirements.
